

Adapter - 16bit unit to 32pin, 8bit devices

Connect the ADP2x8 Adapter to the 40 pin "Target" connector at the rear of the emulator.

Please Note:

The ADP2x8 Adapter is designed for 32 pin target sockets. Our emulators receive power or detect power from PIN 32 of the DIP connector. If you wish to use this adapter with a 28 pin target socket, BOTTOM Justify the cable with the Target Socket (letting Pins 1,2,31 and 32 overhang) and SHORT PIN 28 of the target socket to PIN 32 of the adapter cable.
